

This is in regard to the National Association of Broadcasters' (NAB) petition 04-160, which I respectfully urge you to reject. I have been an XM subscriber for over a year, and have benefitted greatly from their services. In particular, I can listen to the programming I desire without having to endure endless advertising and other pap that passes for informed commentary. The XM service is now even more attractive, considering that it has recently started offering local traffic and weather channels, which are of significant help to me as I travel around the country on business as well as for pleasure. I am most offended that the NAB has the arrogance to assume that it can determine what I am allowed to hear on my paid subscription service. Again, I strongly urge you to REJECT NAB's petition 04-160. Thank you!
